Internet Café Services

Free Internet

Everyone staying at Pheasant Run will have free, in-room internet service. Getting online will be as simple as entering the user name and password provided in literature displayed in the rooms. For those who can't squeeze a computer into the Porsche, the Parade will provide netbook computers in the Hospitality area for entrants to check email and browse the web. These netbooks will be available at stand-up stations and we ask you to limit use to 15 minutes so others will also have a chance to avail the services.

Alternatively, wireless internet service will be free in Hospitality also. So, if you bring your own laptop, you can sit and take all the time you wish.

Free Print-outs and Copies

Because we will have a multi-purpose printer in the Internet Café, you'll have an opportunity to do more than print out email or web pages. For instance, you can make paper copies, but only a few please. If you need more than 5 or 6 pages, please check with the hotel for business services. Also, there are office supply stores in town that can handle large quantities.

Free Color Photo Prints

You can also print out high-resolution 4" X 6" photos directly at the printer. We strongly suggest that you discard bad shots in the camera and **only print out the photos you truly want to share during Parade.**

The photo printer will accept compact flash and most common media cards as well as USB flash drives. If you need to edit photos, we will <u>not</u> be set-up for this time-consuming process. However, if you need to empty your media card, come to the Internet Café with your media card and a USB flash drive and we'll help you copy your pictures onto the flash drive for later processing.
